Summer Internship - 2025

PROJECT MENTOR:

**Uma Shanker**
Deputy Director (IT)/ Scientist 'C'

NATIONAL INFORMATICS CENTER

MINISTRY OF ELECTRONICS AND INFORMATION TECHNOLOGY

Electronics Niketan, New Delhi – 110003

# ACKNOWLEDGEMENT

The satisfaction that accompanies that the successful completion of any task would be incomplete without the mention of people whose corporation made it possible whose constant guidance and encouragement crown all efforts with success.

I am grateful to **Shri Sajjad Akhtar,** Head of the Training Division, my project guide **Shri Uma Shanker** and the whole **NIC Team** for the guidance, inspiration and constructive suggestions that helped in preparation of this project.

## 1. Introduction

This report provides an overview of the internship experience where the focus was on acquiring essential web development skills. The internship was aimed at equipping participants with both frontend and backend programming competencies using tools such as HTML, CSS, JavaScript, PHP, Laravel, and the XAMPP server environment.

## 2. Technologies Covered

During the internship duration below mentioned technologies were covered.

### 2.1. HTML & CSS

- Gained proficiency in creating structured web pages using HTML5.
- Applied CSS3 for layout, styling, responsive design, and cross-browser compatibility.
- Worked on real-world landing page templates and UI mockups.

### 2.2. JavaScript

- Learned basic concepts: variables, data types, loops, and functions.
- Implemented DOM manipulation and event handling.
- Built interactive elements such as sliders, dropdowns, and form validation logic.

### 2.3. PHP

- Understood server-side scripting concepts.
- Worked with form handling, sessions, cookies, and file handling.
- Connected PHP to MySQL for dynamic data processing.

### 2.4. Laravel Framework

- Got hands-on experience with Laravel's MVC architecture.
- Built CRUD applications using Laravel.
- Implemented routing, middleware, authentication, and validation features.
- Explored Laravel Blade templating and Artisan commands.

### 2.5. XAMPP Environment

- Installed and configured XAMPP to create a local server setup.
- Used Apache, MySQL, and phpMyAdmin for project hosting and database management.
- Tested and debugged applications locally.

## 2.6. Database Management

- Management of database in MySql.
- Understanding of queries and how to write one.

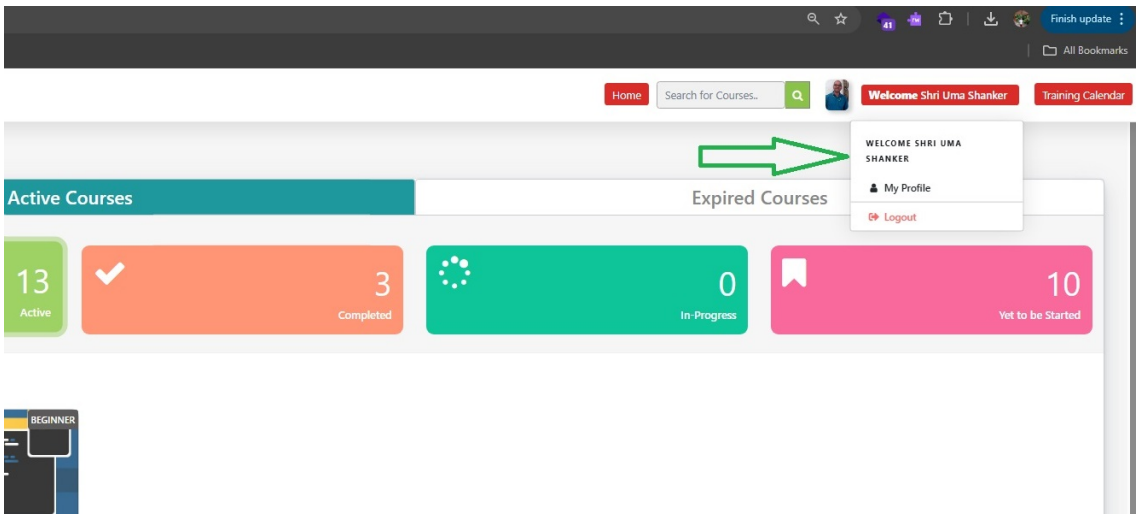

## 3. Project Undertaken

I was assigned a task to display all learning details of the users that includes online and residential training programs in the user profile panel in Vidyakosh. The brief description of Vidyakosh is as follows:

- Vidyakosh is a Comprehensive Learning & Training Management System to manage overall training plan for NIC employees.
- It acts as a tool for monitoring the online learning of NIC employees
- It manages all aspects of classroom training (scheduling, announcement, inviting nominations, finalising participants, generating office orders for nominating officers, uploading attendance & test scores and feedback management, uploading invoice details etc.)
- It also acts as a repository for all the training content and web based training material.

As mentioned in **Image 1**. It is indicated that in user profile panel only user Name, My Profile and Logout options are available.

**Image 1**

I was assigned a task to display the training details (online and residential) of Logged In user along with existing details. As follows in **Image2**:

1. Residential Programs: It is clickable a list of residential programs will be available as shown in **Image 3**.
2. Online Courses: It is also clickable and on click list of residential programs will be available as shown in **Image 4**

**Image 2**

**Image 3**

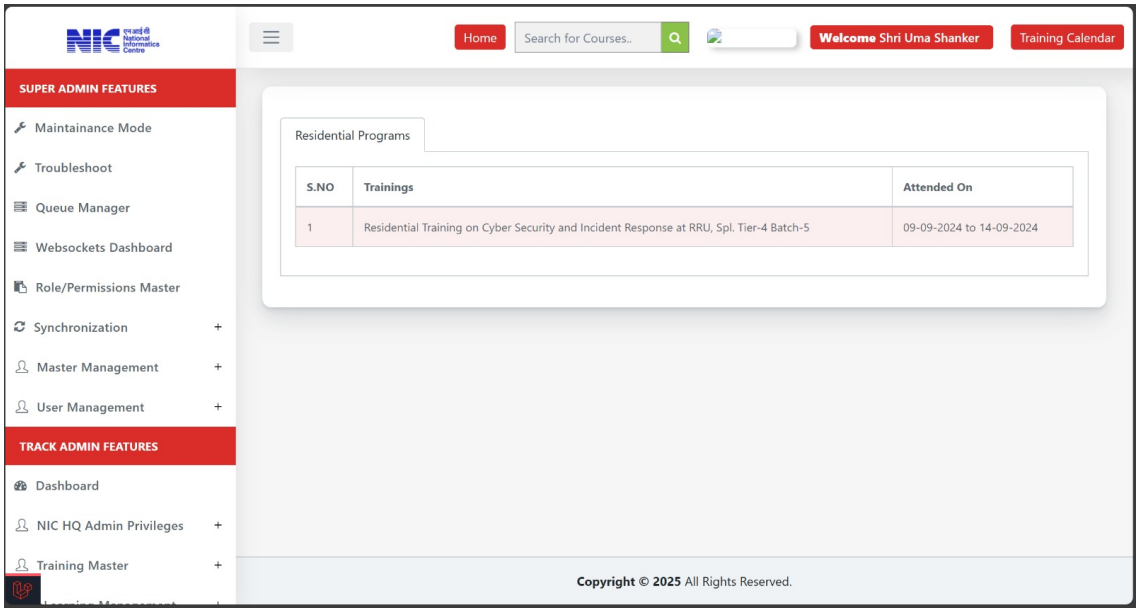

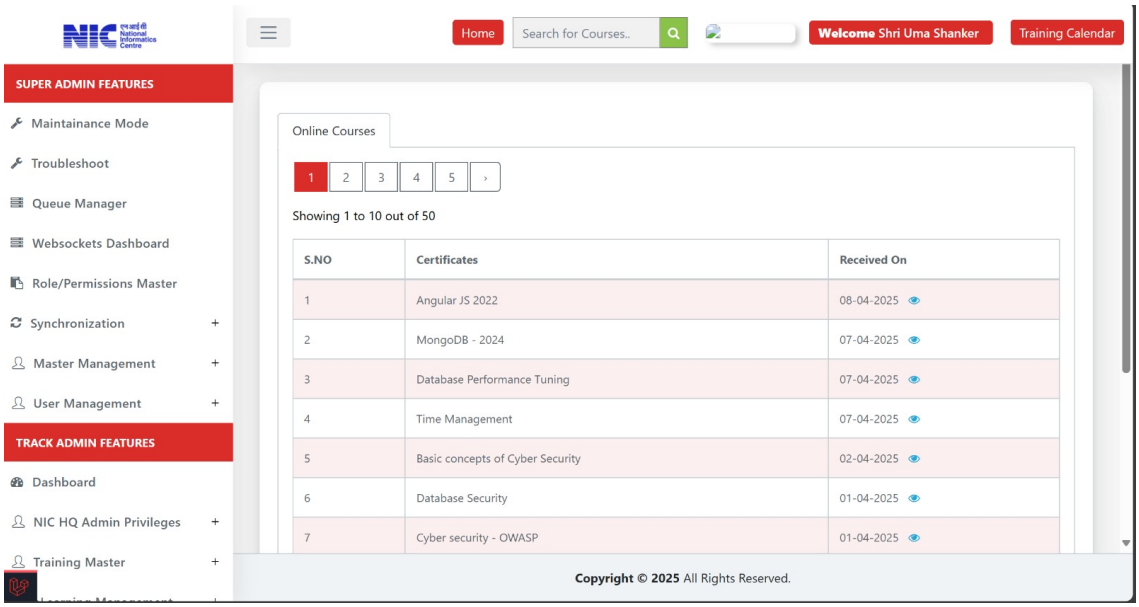

**Image 4**

## 4. Skills Developed

- Frontend development
- Backend logic and database operations
- Full-stack web development workflows
- Debugging and documentation

## 5. Conclusion

This internship served as a platform to learn core web development skills. The integration of both frontend and backend technologies enabled a complete understanding of full-stack development. The knowledge acquired will be instrumental in future projects and professional roles in the software development field.
